Buckwheat has been discovered to be a much more economical source than tobacco as a source of rutin, a drug used in the prevention of many causes of blindness and heart disease.

The buckwheat is harvested while still in its green stage. As the plant will not sprout again, it is necessary to reseed if more than one crop is to be secured. It is possible to secure two or three crops

Find No Boost in Neurosis From Bombings

The devastating air raids over London during the war years did not increase mental disorders, according to the London correspondence of the Journal of the American Medical Association.

"The important conclusion is reached that there are no grounds for supposing that the war has caused an increase in the more serious forms of mental disorder requiring admission to a hospital. This is remarkable in view of the heavy bombing, with considerable loss of life and injuries to persons and destruction of buildings in our cities while the country was passing through the greatest danger to which it ever was exposed."

"The threat remains that the coming years may show an increase in neurotic disorders as a result of the difficulties of adjustment associated with demobilization and the return of prisoners who have endured German barbarities."

It shows that Greyhound truly shares in the life and interests of the people it serves.
